

After running the file:

Using the add button:

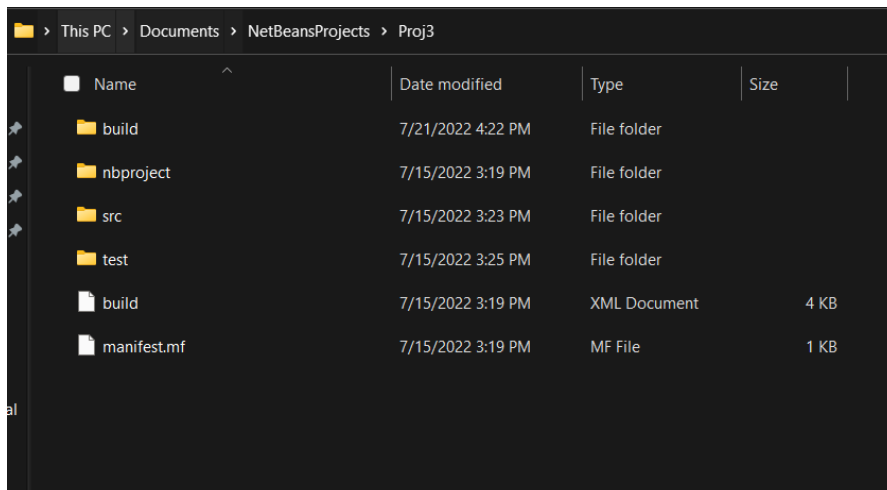

After adding multiple movies to the list:

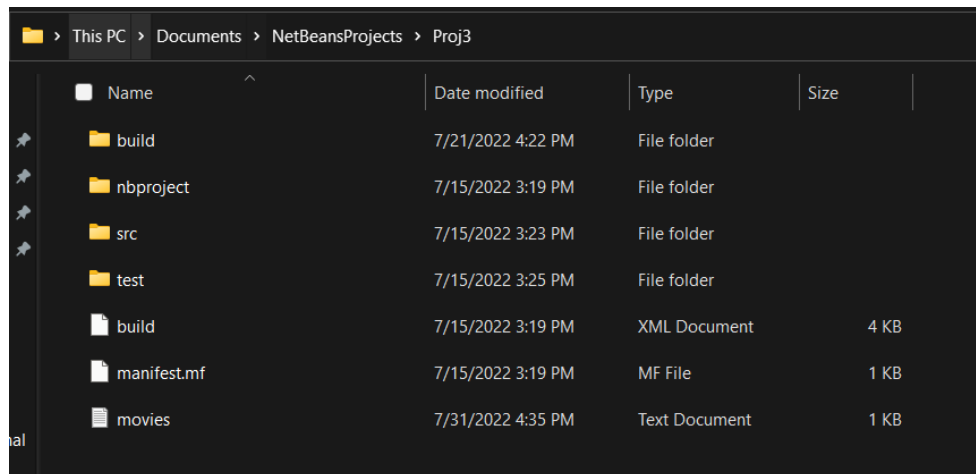

Using the save button:

1. Before saving the file:

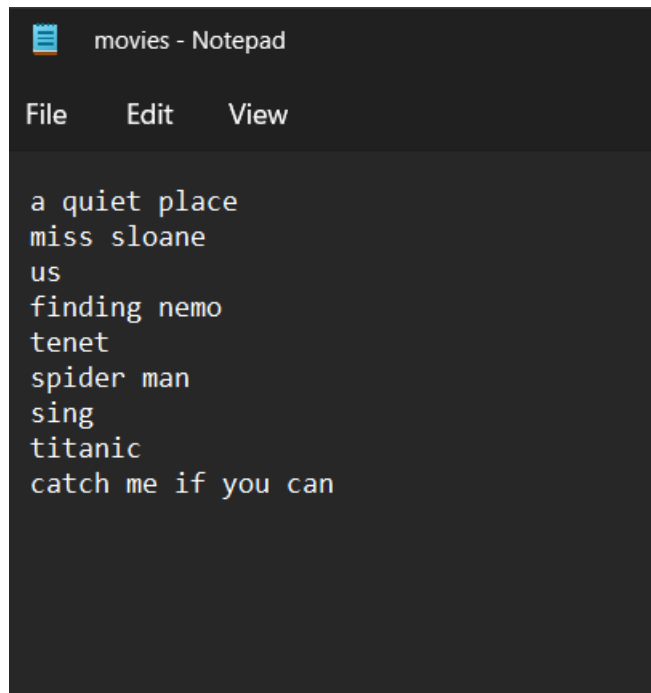

2. After saving the file, we can see that the program has created a new text document named movies at the bottom.

The screenshot shows a Windows File Explorer window with the address bar set to "This PC > Documents > NetBeansProjects > Proj3". The main pane displays a list of files and folders. On the left, there is a sidebar with navigation icons. The main list has columns for Name, Date modified, Type, and Size.

Name	Date modified	Type	Size
build	7/21/2022 4:22 PM	File folder	
nbproject	7/15/2022 3:19 PM	File folder	
src	7/15/2022 3:23 PM	File folder	
test	7/15/2022 3:25 PM	File folder	
build	7/15/2022 3:19 PM	XML Document	4 KB
manifest.mf	7/15/2022 3:19 PM	MF File	1 KB
movies	7/31/2022 4:35 PM	Text Document	1 KB

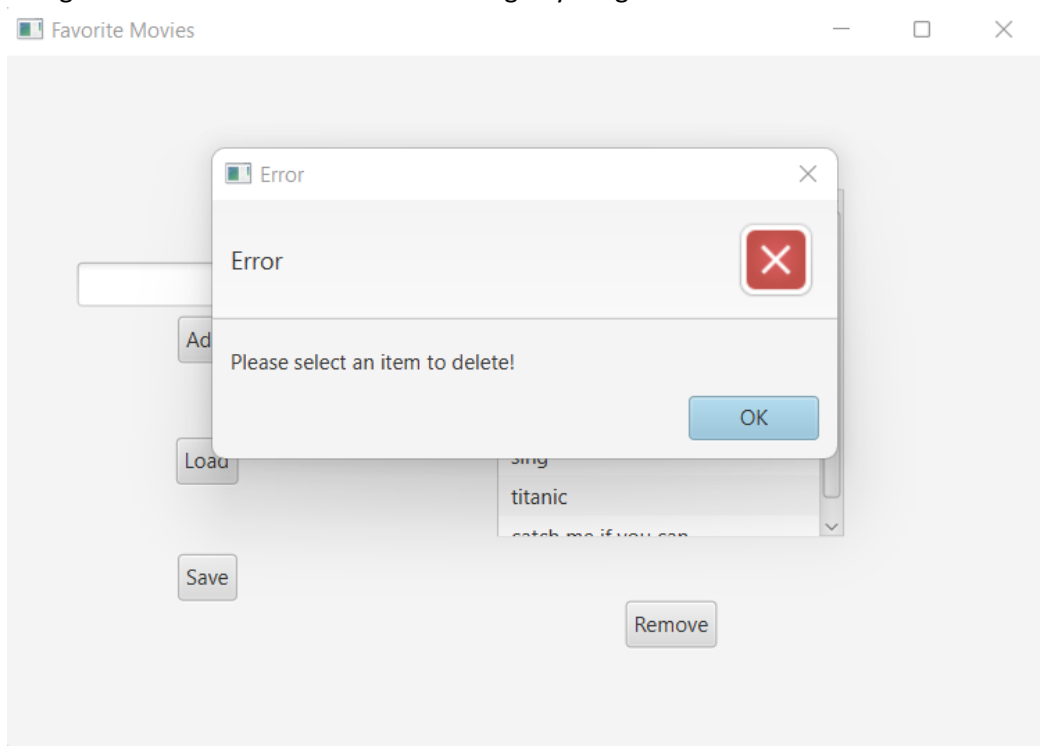

3. The document has saved all the movies that were added to the list in the beginning.

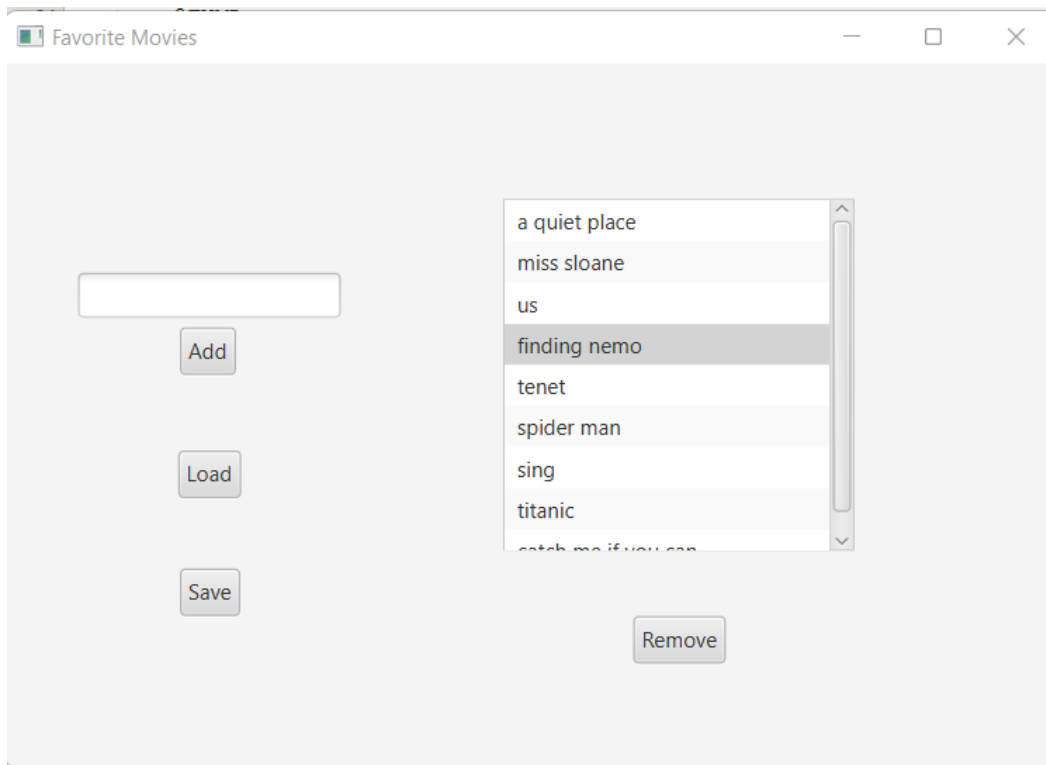

The screenshot shows a Notepad window titled "movies - Notepad". The menu bar includes "File", "Edit", and "View". The text area contains a list of movie titles, each on a new line.

```
a quiet place  
miss sloane  
us  
finding nemo  
tenet  
spider man  
sing  
titanic  
catch me if you can
```

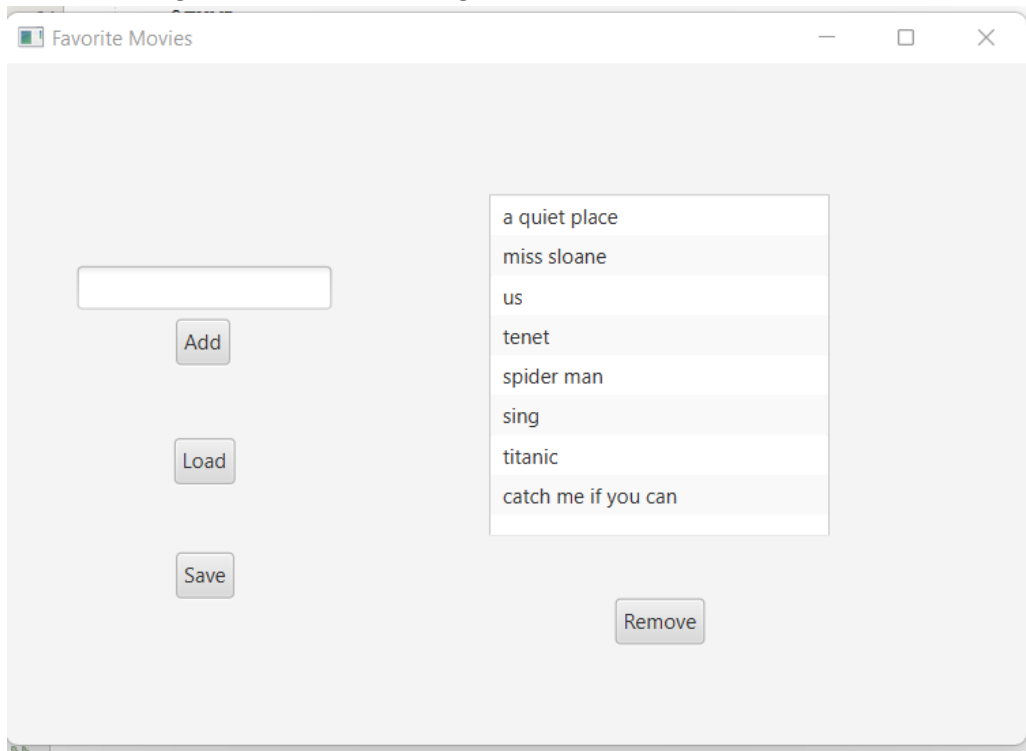

Using the remove button without selecting anything:

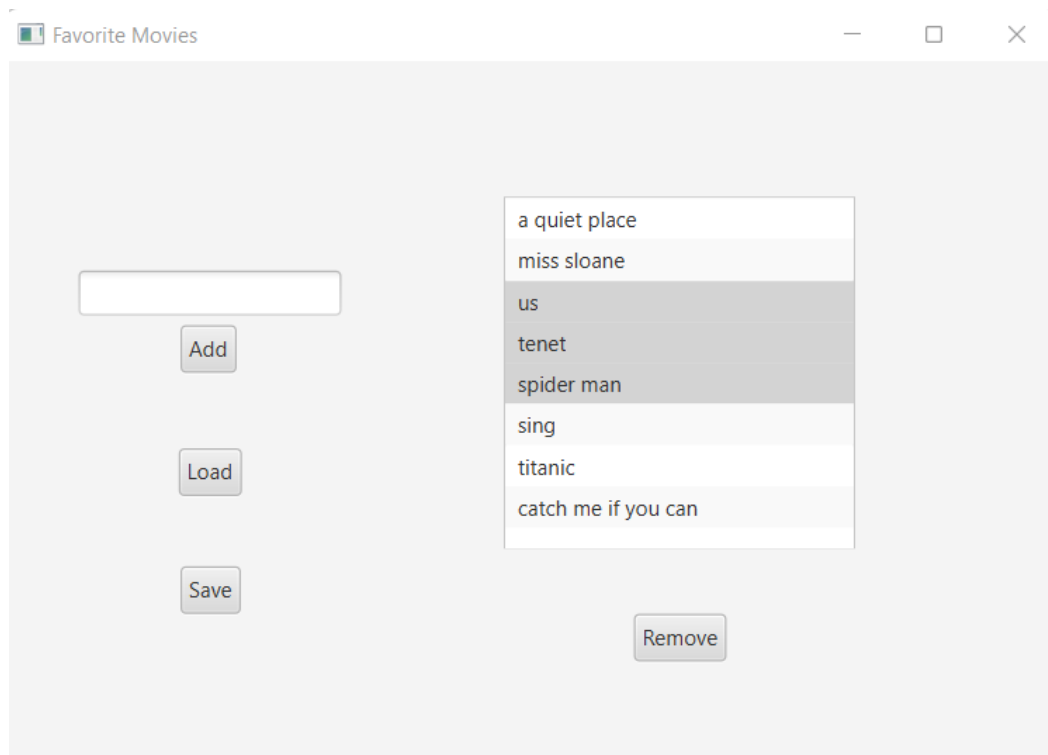

Using the remove button to remove one selected item:

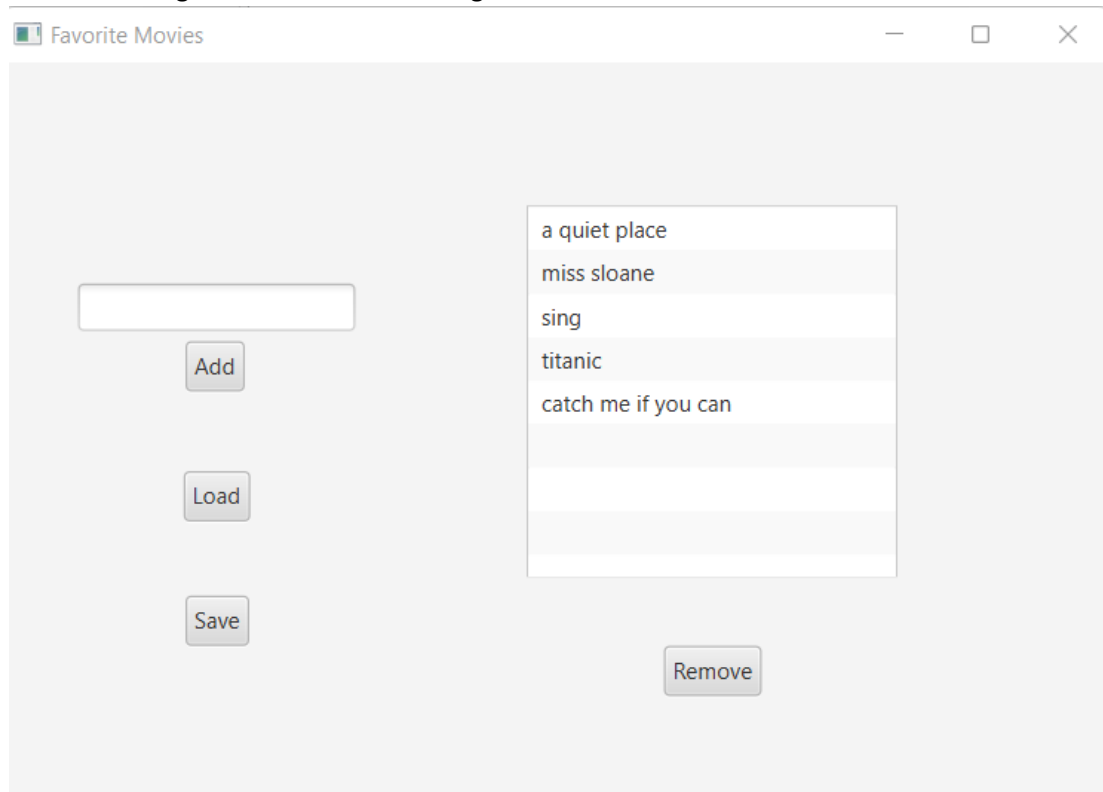

After removing the selected item using the remove button:

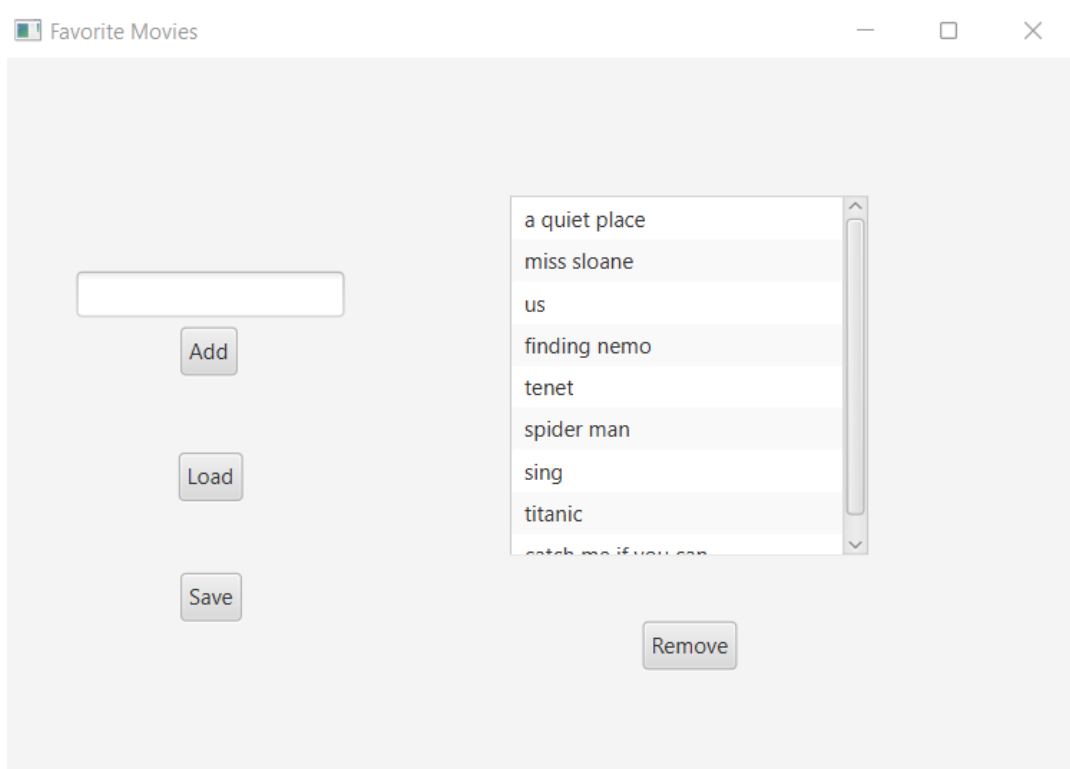

Using the remove button to remove more than one selected item:

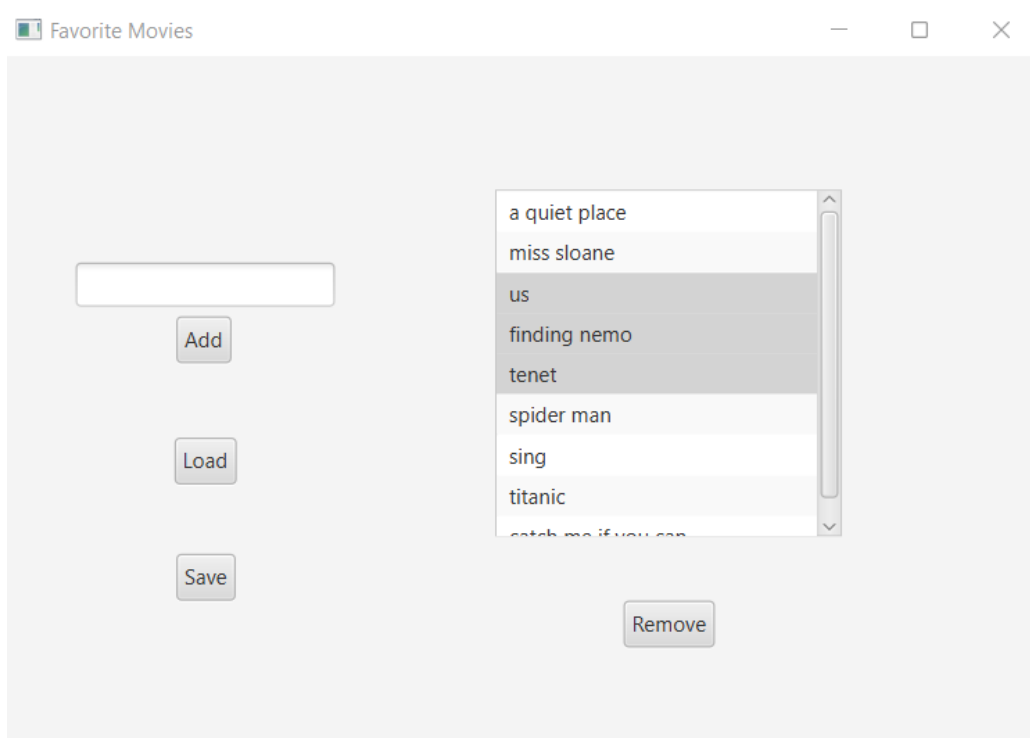

After removing the selected items using the remove button:

Used the load button to open the previously saved movies list:

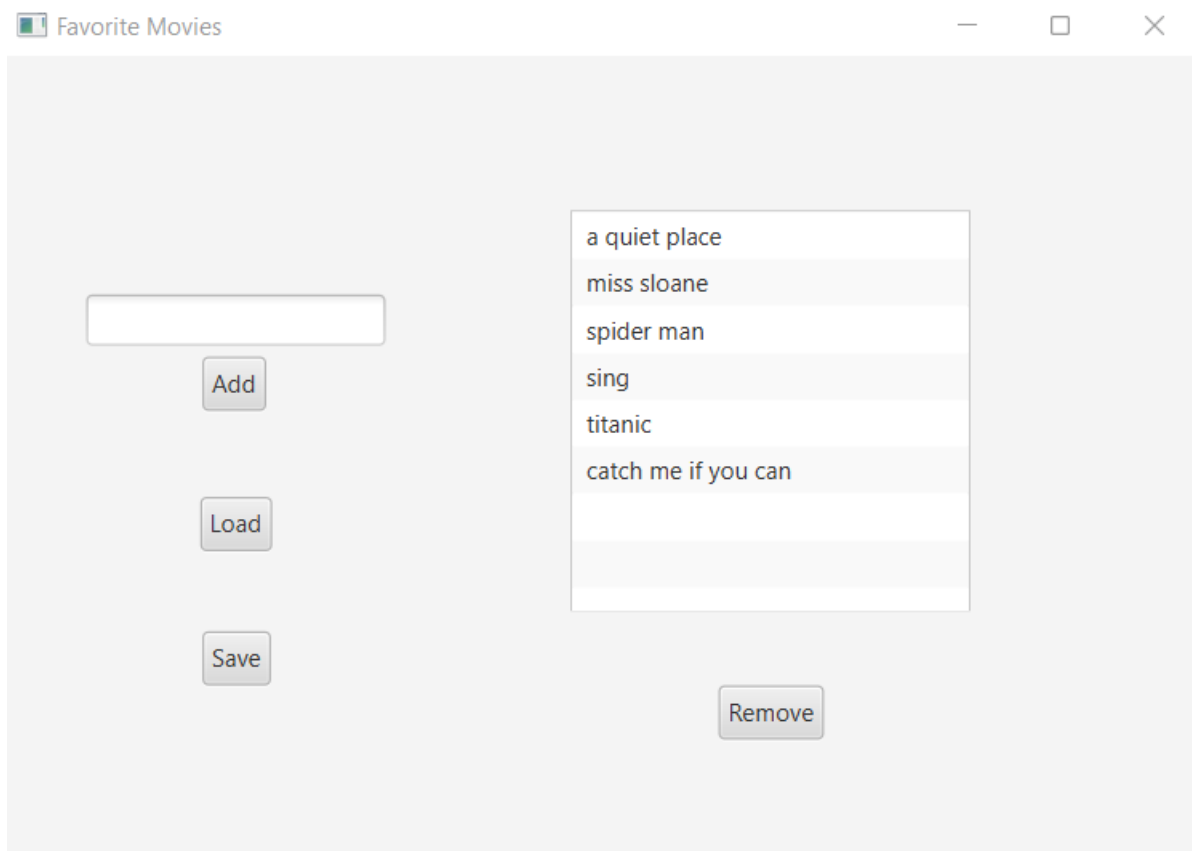

Using the remove button again to remove more than one selected item:

After removing the selected items using the remove button:

Lastly, I saved the list and the movies text document was overwritten with the updated list.
